DATA ANALYST

MSBA candidate with a background in engineering and Division I athletics, bringing an analytical, disciplined and open mindset to business problems. Skilled in Python, R, and Excel, with hands-on experience in data analysis, computational modeling, and product development from engineering coursework and applied projects. A Division I cross country and track athlete from Germany who found his passion from translating training data and performance analysis to drive his training decisions. Combines technical rigor with leadership to turn raw data into actionable insight.

EDUCATION

Wake Forest University School of Business Winston-Salem, NC
Master of Science in Business Analytics *Expected May 2027*

Wake Forest University Winston-Salem, NC
Bachelor of Science in Engineering – Mechanical Concentration, Minors: Mathematics, Physics *May 2026*

GPA: 3.93 | **Honors:** Magna Cum Laude, Department Honors, ACC Mile Champion, 2x All American, 8x All ACC Academic

AREAS OF EXPERTISE

Analytical Problem-Solving | Data Visualization | Data Analysis | Product Development | Time Management | Regression Modeling
Computational Modeling | Statistical Analysis | Team Leadership | Stakeholder Engagement | Critical Thinking | Data Cleaning
Structural & Fluid Mechanics Analysis | Detail Oriented | Organization Skills | CAD Modeling | 3D Printing | Youth Mentoring

TECHNICAL SKILLS

Programming Languages: Python, MATLAB, R

Predictive Modeling & Statistical Analysis: Linear Regression

Software & Tools: Microsoft Excel, Word, PowerPoint; Collaboratory; Autodesk Fusion 360; Mathematica; Adobe InDesign

PROFESSIONAL EXPERIENCE

CROSS COUNTRY CAMP COUNSELOR | **Thunderroad Running** *July 2026*

- Led and mentored a group of high school student-athletes throughout a week-long distance running camp
- Hosted Q&A sessions on race-day tactics and the transition to collegiate athletics and lifestyle, drawing on experience as a Division I runner
- Managed daily logistics and meal planning for the group, ensuring a smooth, well-organized camp experience

ENGINEERING INTERN | **Mercedes Benz** | Sindelfingen, Germany *March 2021*

- Analyzed assembly line operations to evaluate production efficiency and identify workflow improvements
- Gained hands-on exposure to automotive product development and manufacturing processes
- Disassembled and reassembled engine systems to build mechanical troubleshooting and diagnostic skills

ATHLETICS & LEADERSHIP

NCAA DIVISION I TRACK & FIELD ATHLETE *June 2022 - Present*

- Trained consistently more than 20 hours per week to enhance athletic ability while maintaining full course load, requiring disciplined time management
- Served as a leader by keeping teammates accountable, leading them to the 2024 ACC XC Championship
- Managed the high-pressure environments to become the 2026 ACC Mile Champion

ANALYTICAL PROJECT EXPERIENCE

Soccer Player Valuation Analysis (Summer 2026): Conducting regression and correlation analysis on a dataset of professional football players to identify key drivers of player value, using Python (pandas, matplotlib) and Excel to clean, analyze, and visualize the data as part of a team project

OTHER PROJECT EXPERIENCE

Heart Preservation Device - Mechanical Team Lead (2025-2026): Led a team in developing and refining functional prototypes for a novel heart preservation device; researched existing preservation technologies to identify design limitations; applied CAD modeling and engineering principles to increase viability time from 3 hours to 4 hours by using perfusion

Cardboard Emergency Bed Project (September 2022): Designed a rapid-deployment bed structure for use in emergency response scenarios; used laser-cutting technology to fabricate a reusable structural component comprising 90% of the bed; strengthened problem-solving and collaboration skills through iterative prototyping and testing
